Marshfield DoorSystems® announces enhancements to their already broad offering of products certified through Scientific Certification Systems Indoor Advantage™ Gold certification.

Marshfield DoorSystems is pleased to announce that all products manufactured in Marshfield, Wisconsin that are factory finished veneer, primed, or made of High Pressure Decorative Laminate, Low Pressure Decorative Laminate or Durable Surface material are now included under the SCS Indoor Advantage Gold™ certification. Marshfield DoorSystems enhanced offering now include lead-shielded doors and those finished with an anti-microbial additive. Whether you need standard swinging doors made with particleboard, staved lumber, structural composite lumber, or fire-resistant composite material, or those with acoustic ratings or lead-shielding to meet indoor air quality emission requirements, Marshfield DoorSystems has them all.

The SCS Indoor Advantage Gold™ certification program, developed by Scientific Certification Systems (SCS), certifies compliance with rigorous indoor air quality emission requirements. The program is designed for interior building materials, furnishings, and finish systems, including wood doors.

Marshfield DoorSystems products certified under the SCS Indoor Advantage Gold certification demonstrate conformance with the following;

- California Specification 01350 (Standard Method v1.1) for the school classroom and private office
- USGBC Leadership in Energy and Environmental Design criteria for EQ4.4 (LEED for Schools)
- Collaborative for High Performance Schools (CHPS) criteria for indoor air quality

Marshfield DoorSystems products covered under the SCS Indoor Advantage™ Gold certification, offers many benefits to sustainable building projects. Products certified;

- Ensure the end-user that the products they purchased truly meet indoor air quality standards
- Certifies compliance with California Special Environmental Requirements Specification 01350
- Allows value engineering of sustainable projects not requiring compliance with the No Added Urea Formaldehyde requirement by providing a reduced cost product made with Urea Formaldehyde.
- Gives you satisfaction of supporting a manufacturer with a commitment to environmental sustainability and healthy environments

Marshfield DoorSystems is recognized as a leader in the wood door industry with a strong commitment to sustainable construction. While other manufacturers may have independent testing reports on some of their offerings, you can be assured that Marshfield DoorSystems exceptional offering of all types of doors will fulfill the needs of your project.
